

# Arum Health Managed Care Platform

## Patient Profile Matrix AI/ML

## Managed Care Apps

A Mobile and Web Solution  
for a value based care model

We provide value-add tools to lower hospital readmissions. Arum Health delivers a comprehensive approach to collect, analyze and discover data. Our solution better assists patients and residents that are enrolled in guided programs – Behavioral Healthcare, Assisted Living, and Transitional Healthcare.

## Resident Administration

All the information you need about resident administration is here! From resident and doctor catalogs to prescriptions and refills.

## Adherence & Compliance

Our commitment is to supply all the information that you need about your resident's behavior real time. Resident's Adherence and Compliance are our main concern.

## Medication

Refills are a corner stone for a successful recovery. Our medication count refill scheme provides early warnings about the amount of medication available for each resident allowing proper refills for a non stop recovery process.

## Communication

Provide the ability to communicate between Med Techs, Case Managers, Caregivers, and family members.

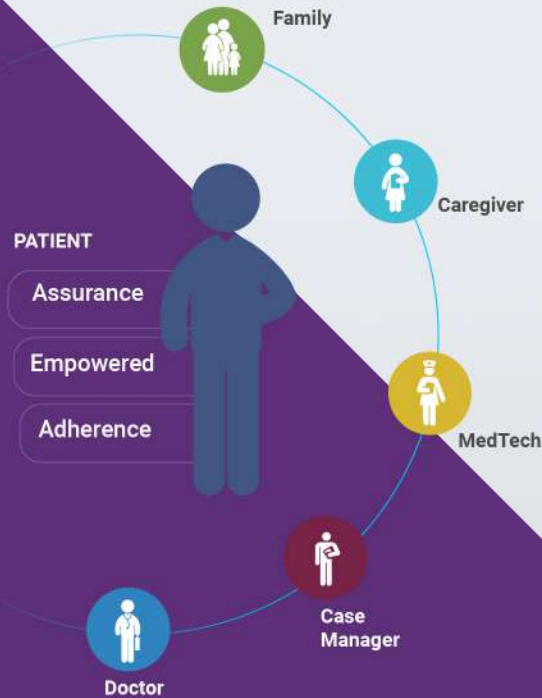

## Reports

Helps physicians and medical staff provide better treatment, enroll in correct program, and assist facilities by identifying patient's success factors with a specific treatment.
